- IP65, NEMA Type 4X rated
- See back page for part numbers and pricing
- Additional sales tools including the E-Stop announcement and launch kit are available on the distributor site at www.idec.com/distributor

New Emergency Stop Stations offer more options than ever before

IDEC emergency stop stations now give customers more choices. IDEC enclosures coupled with IDEC HW and XW emergency stop switches are a perfect match.

Our E-stop stations offer a variety of contact configurations (up to 4NC contacts); 29, 40 or 60mm mushroom heads; metal or plastic bezels; illuminated (24V AC/DC) or non-illuminated versions; and spring-up terminals (HW series) or standard terminals (XW series).

These E-stop stations offer customers a choice between Push-lock turn, Push-pull and Push-lock key reset operations. Push-lock turn reset E-Stop stations also available with an EMO marking. Plus the bright yellow enclosures enhance visibil-

ity ensuring they can be easily located in case of emergency.

A polycarbonate enclosure and stainless steel screws make these enclosures corrosion resistant and durable over a long life. Plus all E-stop stations are IP65 and NEMA Type 4X rated, making them suitable for dusty and humid environments. IDEC E-stop stations are ideal for use in industries such as material handling, food, semiconductor, HVAC and more.

For more information, please call IDEC at 1-800-262-IDEC (4332) or visit www.idec.com/usa.
