Explosion Protection & Harsh Environment

Explosion-Proof Explosion-Safe Intrinsically-Safe Robust Heavy Duty

"New Frontiers in Safety, Security and Comfort" is PATLITE's mission.

PATLITE offers state-of-the-art equipment for process and industrial automation for over 60 years. Our Innovative and robust design, backed by a powerful commitment and years of knowledge, has made PATLITE the world's best known manufacturer of the visual and audible signaling products. We are also dedicated to the development of explosive and harsh-environment products to demonstrate our strong commitment to serving the industry with unique and innovative solutions.

In order to identify the diversified needs of our customers, and respond quickly and satisfactorily to those needs, we have implemented the POP (Point of Production) System together with a lean-manufacturing cell-based assembly system (combination, single, and flexible assembly).

These new systems allow us to handle any order rapidly from single items to customized item orders.

We've also reduced development time and production cost by having our own in-house machinery to produce, design and manufacture metal moldings and plastic materials with the use of injection machinery.

From designing to production, from raw material to the finished product, we also manage our quality control throughout the entire process. This is how we maintain our world class quality reputation in the visual, audible signaling and networking information products.

From designing to production, quality control is managed throughout the process.

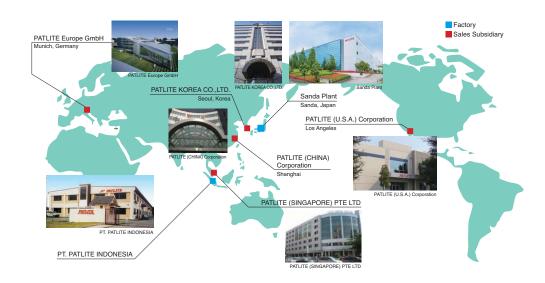

World-wide Sales, Marketing and After-sales Support Network.

Wide-range of Innovative and World-class Quality Products.

Design with 3-D CAD

● Electrical discharge machine ● Machining Center

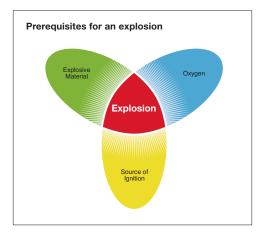

Injection molding machines

■ How Explosion Occurs

Mixture of oxygen and explosive substance develop explosive gases. When the concentration of the substance in air is within the lower and upper explosive limits, the mixture can be ignited.

To prevent an explosion, one of three prerequisites must be eliminated. To make equipment an ignition-free to install in explosive environment is one of the solutions.

PATLITE offers Explosion Proof, Explosion-Safe, Intrinsically-Safe visual and audible signaling products as well as LED illumination work lights in order to increase safety in the work environment.

■ An explosive environment is categorized in three segments, Zone 0, Zone 1 and Zone 2, depending on the hazardous level of gases and vapors.

Zone 0

An area where an explosive atmosphere consisting of a mixture of air containing flammable substances in the form of gas, liquid, or vapor is continuously present and/or frequent.

Zone

An area where an explosive atmosphere consisting of a mixture of air containing flammable substances in the form of gas, liquid or vapor is likely to occur under normal conditions on occasion.

Zone 2

An area where an explosive atmosphere consisting of a mixture of air containing flammable substances in the form of gas, liquid, or vapor is not likely to occur under normal conditions. However, if it occurs, it will only be for short periods of time.

■ Various Applications for Explosion-Proof, Explosion-Safe and Harsh Environments.

	Branch	Explosion Hazard
2545	Power Generation Companies	● Lump Coal Dust
	Woodworking Industry	Saw Dust Fine Wood Chips
	Metal-work Operations	Explosive Metal Dust Spark-ignitable Metal Dust
	Food/Beverage Industry	Ignitable Grain Dust Explosive Sugar Dust
	Refinery Industry	Hydorocarbons close to their flash-points Oil Processing Plants
	Waste Disposal Companies	Waste-water Treatment Gasses
	Landfills/Civil Engineering	Flammable Landfill Gases Uncontrolled Gas Emissions Flammable Gas from poor ventillation sources
HHH	Pharmaceutical Industry	Alcohol Solvents Materials explosive when mixed
	Gas Suppliers	Natural Gas Leakage Natural Gas Emissions
	Paint-spraying Operations	Overspray in Spray-paint Bays Solvent Vapor Emissions
	Recycling Operations	Unemptied flammable gas/liquid containers Biodegradable Material Emitting Explosive Gasses
E	Chemical Industry	Flammable Gases Flammable Liquids Flammable Solids
Section 1	Agriculture	Bio-gas Production Plants Bio-gas Located on Farms

Classification of Hazardous Areas

■ Gases/Vapors

A tank filled with flammable liquid: There is a potential risk of an explosion which may occur inside the tank. Therefore, the inside of the tank is categorized as Zone 0. Vapor may escape on occasion through the vent on the top of the tank, therefore the area around the vent is categorized as Zone 1.

The vapor may also run down the outside of the tank, developing another explosive environment, so the area around the tank is categorized as Zone 2.

		Constant Exposure	Occasional Exposure	Rare and Temporary
ATEX	EC60079-10	Zone 0 (Category 1)	Zone 1 (Category 2)	Zone 2 (Category 3)
IEC	IEC60079-10	Zone 0	Zone 1	Zone 2
	NEC505	Zone 0 (class I)	Zone 1 (class I)	Zone 2 (class I)
	NEC500	Division 1	Division 2 (Class I)	

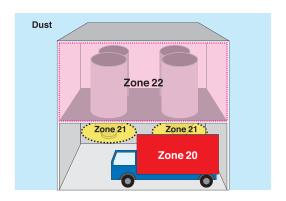

Dust

At a mill with a feed hopper and filter: A product, which causes dust particles mixed with sufficient air to cause an inflammable mixture, is loaded into a hopper.

Inside the feed hopper and filter, it is categorized as Zone 20. While the product is being loaded, the mixture of dust and air

causes a potentially explosive compound in the area where the product is loaded into the hopper, so the area outside the hopper is categorized as Zone 21.

Around the hopper where a potential inflammable atmosphere exists temporarily is categorized as Zone 22.

■ IP Protection Rate: Index of Ingress Protection

IP69K

IP69K is the German DIN 40050 PART9 standard. It is defined as a protection regulation for high temperature and high-pressurized water. Water is heated up to 80 °C and sprayed at a water pressure in the range from 80 to 100 bars at 14 to 16 liters per minute at the test object. The test object is at a distance of 100 to150 mm from the nozzle and sprayed in all directions at 0, 30, 60, and 90 degrees, then sprayed at a horizontal angle while it is being rotated, all done for a period of 30 seconds without being affected by water penetration.

Note: Model CLA LED light bars comply with IP69K. See page 16 for more details.

Explosion-proof Maintenance Free LED Signal Lights

The EDLM and EDWM series LED signal lights are visual warning and status indicating lights for use in hazardous locations that requires compliance with the ATEX Directive 94/9/EC (CENELEC standard) or NEC Article 505 certification.

The EDLM and EDWM series offers wide range of voltages and versatile mounting options to meet various applications. The following chart explains the comparison between the ATEX Directive 94/9/EC (CENELEC standard) and NEC Article 505 certification. To find the most suitable models, refer to page 9 and 10.

Explosion-Safe Visual/Audible Signaling Products & LED Light Bars

A wide range of visual and audible signaling products, as well as super bright LED light bars, designed for use in hazardous locations that require the ATEX Directive 94/9/EC (CENELEC Standard). These unique and innovative models meet the

criteria for Zone 2 (gas) and Zone 22 (dust) atmospheres. The CLA series LED light bars meets the criteria for intrinsically safe applications.

EDLM SERIES & EDWM SERIES EXPLOSION-PROOF

Descriptions

The EDLM (colored 3 tiered LED) and EDWM (colored 5 tiered LED) are innovative LED maintenance free Signal Towers. The robust design with pressure and flame-proof housing is ideal for use in potentially flammable and hazardous explosive atmospheres such as chemical, petrochemical, combustible dust, production of mineral/natural gas, and even in the manufacturing of polysilicon for the photovoltaic, semi-conductor industries, as well as the food and beverage industries.

■ Features

- Housing: Aluminum allov
- Glass: Borosilicate glass
- Terminals: Easy wire connection to the Signal Tower by opening the bottom
- Mounting: Upright, Wall Mount, Vertical-mount, and Horizontal Mount
- LED color: Different color configurations are possible to custom-design
- Voltage: 24VAC/DC, 120VAC, 230VAC, 90-250VAC are available.
- Wire core size: 0.5mm²~0.8mm², AWG20~AWG18

AR-070 SERIES EXPLOSION-SAFE

Explosion-safe Signal Light Ø40mm

Description

Explosion-safe Signal Light featuring an LED light that is versatile and energy-efficient. The vertical and horizontal cut lenses in combination with a double-reflection system enhances the LED light diffusion to create a unique, full and brilliant light. The lenses and main body are made of strong synthetic materials with characteristics to withstand harsh environments. The Signal Light can be ordered in any combination from 1 to 5 LED units with any color combination. In addition to its "continuous lighting" condition, the Signal Light can also be ordered with flashing / non-flashing functions, as well as with two super-loud alarm sounds with an 85dB (at 1m) output.

Features

- Explosion-safe for gas and dust
- Suitable for Zone 2 and Zone 22
- CE compliance in accordance to ATEX
- Full and brilliant lumination
- LED double reflection lighting system
- · Different lens colors available
- From 1 to 5 tiers
- · Available with "flashing/non flashing" and two
- audible buzzer alarm sounds
- Ingress protection of IP65
- · Wall mount or direct mount

105dB(A) MP3 Field Programmable Announciator, Melody Horn

- Explosion-safe for gas and dust
- Suitable for Zone 2 and Zone 22
- CE compliance in accordance to ATEX
- Super bright LED colors correspond to different voice, sounds, chimes and melodies.
- Voice alert messages of up to 63 seconds (64kbit/s) with 5 channels can be played back.
- 32 combinations of sounds, chimes and melodies are pre-recorded.
- 8 sounds can be played back by a bit input, and 32 sounds by binary input.
- Volume is adjustable from 0 to 105dB at 1 meter.
- Field programmable with MP3 by SD card for the model LKEHFV/EXN.
- Well visible with the super bright 100mm diameter LED from far distance.
- Robust design to withstand against 2G vibration.
- The body is made of Acrylonitrite-Ethlene-Styrene for weather resistant.
- Easy to control by only one common wire for both LED units and audible signals.
- NPN is standard. PNP open colletor type is also available on order.
- Protection rating of IP65

105dB (at 1m) Voice Annunciator ADPCM 64kbit/s

- · Explosion-safe for gas and dust
- Suitable for Zone 2 and Zone 22
- CE compliance in accordance to ATEX
- 4 pre-recordable messages on EPROM
- . Maximum 63 seconds for recording time.
- Adjustable audible sound volume up to 105dB at 1 meter
- ADPCM 64kbit/s clear sound quality from an LSI digital voice synthesizer.
- Indoor Installation: upright, inverted, and sideways.
 Outdoor: upright installation only.
- Provided with an anti-corrosive stainless steel mounting bracket.
- 12/24VDC & 12/24VAC
- Protection rating of IP65

105dB (at 1m) Melodies & Chimes Horn

- Explosion-safe for gas and dust
- Suitable for Zone 2 and Zone 22
- CE compliance in accordance to ATEX
- 32 combinations of melodies, chimes and sounds are pre-recorded.
- Adjustable audible sound volume up to 105dB at 1 meter
- Indoor Installation: upright, inverted, and sideways. Outdoor: upright installation only.
- · Provided with the anti-corrosive stainless steel mounting bracket.
- NPN is standard for the EWH type. PNP open collector is available on order.
- CE compliant : 24VAC/DC only
- IP65

RES-A Heavy Duty Revolving Warning Light for Harsh Environment

Robust Heavy Duty Revolving Warning Light

- φ224mm diameter.
- Integral Rotating Parabolic Reflector: For enhanced visibility from a distance.
- Installation: Indoors-upright, inverted, sideways; Outdoors-upright only.
- . Main Body: Aluminum alloy die-cast with silver color baked finish.
- Dome: Acrylic resin covered with clear hard-glass, and metal guard.
- · Available Colors: Red, Amber, Green and Blue.
- Approved by: TIIS (Technology Institution of Industrial Safety).
- The metal cable gland is an optional part. Needs to order separately.

TIIS is a non-governmental, non-profit and self-sustaining organization founded in Japan in 1965 and recognized by the Minister of Health, Labor and Welfare as a juridical incorporation, to help reduce industrial accidents and contribute towards the benefits of industrial sectors in Japan through its various technological activities.

RLR Robust Heavy Duty 11.2G LED Super Bright Beacons for Harsh Environment

- 162mm diameter
- 11.2G Anti-Vibration
- IP66 Protection
- Robust Heavy-duty Design
- . Dual LED with Twin Reflector
- Maintenance-free with Brushless Motor
- · Strong Polycarbonate Housing
- CE Compliant (12/24VDC)

LED + Brushless Motor + Bearing Mechanism

The RLR has many advantages compared to a rotating beacon with incandescent bulb and standard motor. The LEDs last approximately 20 times to 40 times

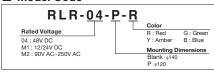

longer than an incandescent bulb. The combination of the brushless motor and bearing mechanism allows the RLR to operate from 8,000 hrs to 10,000 hrs, compared to 5,000 hrs for other rotating beacons.
