MODULAR  
I/O SYSTEMS  
AND COMPACT  
I/O MODULES IN  
IP20 AND IP67

***Sense it! Connect it! Bus it! Solve it!***

# Modular I/O systems and compact I/O modules in IP20 and IP67

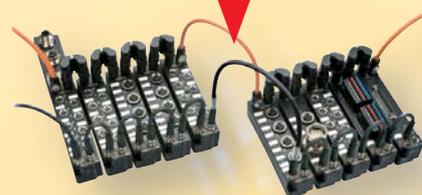

Perfect connections – no matter which fieldbus you use; TURCK provides you with a complete range of products:

- Modular and compact I/O systems in a variety of housing styles and IP-ratings
- Optimal support for planning, commissioning and service with the I/O-ASSISTANT software tool
- Decentralized intelligence with IEC 61131

# The BL67 I/O system – the modular I/O system in IP67 for temperature range -25...+70 °C

## Gateway:

### The system control

- The interface to the higher level control system
- Gateways for PROFIBUS-DP, CANopen, DeviceNet™, PROFINET IO, EtherNet/IP™ and Ethernet Modbus TCP

## Optional:

### CoDeSys-programmable according to IEC 61131

- Relieves higher-level controller and bus system
- I/O modules independent of the fieldbus
- Prefabricated function blocks e. g. for the RFID *BL ident*® system and serial interfaces

## Power Feeding Module

- Power supply for the field, sensors and actuators
- Enables the creation of potential groups which can be switched on or off according to the requirements of the application

## Operation control with Pick-to-Light sensors

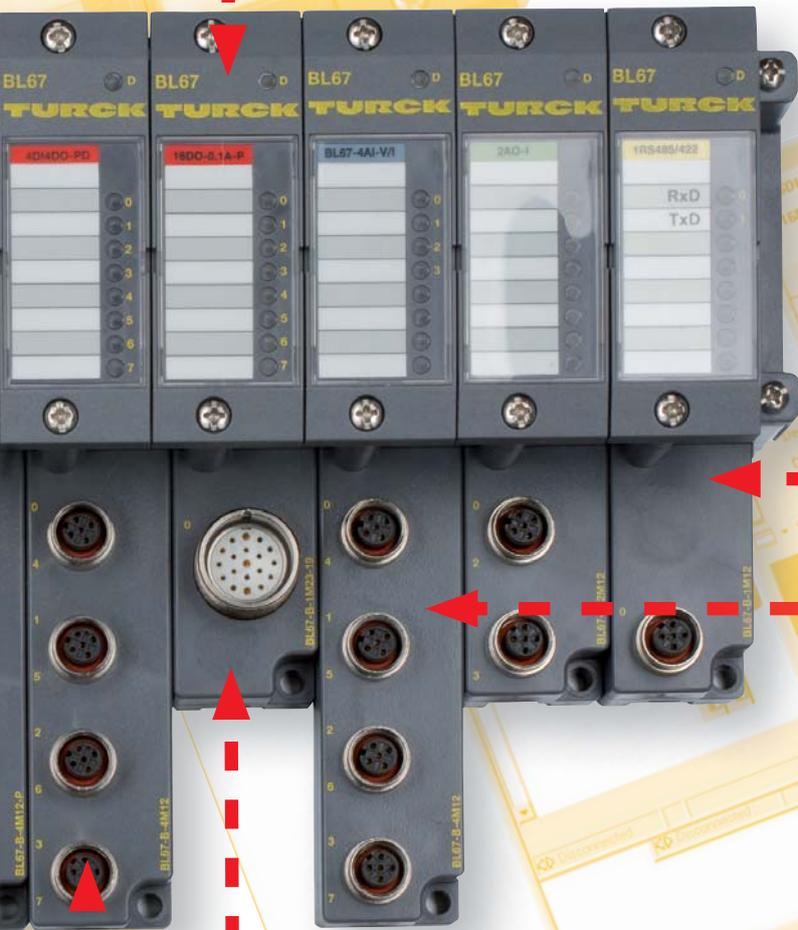

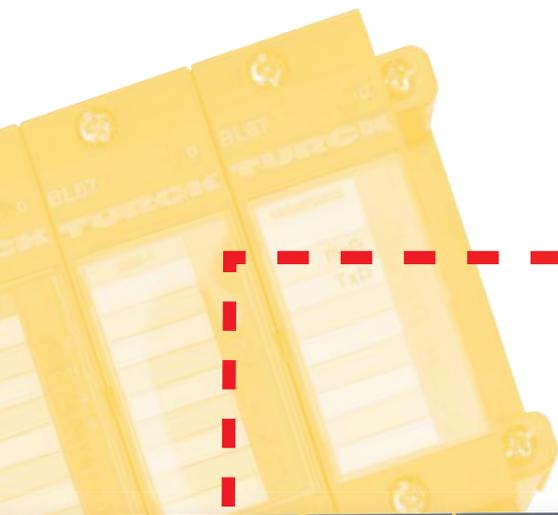

- Combined digital modules enable one input and one output per M12 connector
- Prefabricated standard M12 sensor cables

## BL ident® system

- The modular RFID system made by TURCK
- Modular extension, up to 8 channels  
Temperature range of the data carriers between -40 and +210 °C

Modbus TCP

**Elektronik modules**

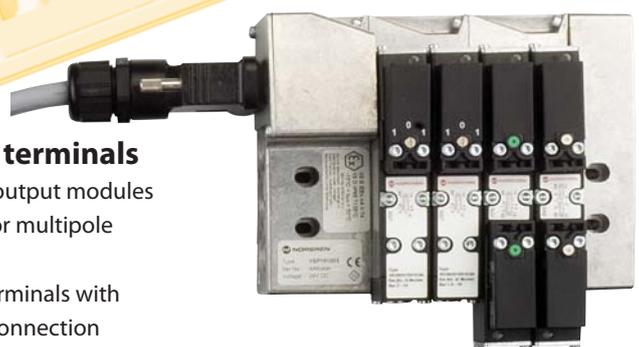

- Digital, analog, temperature, RS232, SSI, CANopen interface and more
- Independent from the applied fieldbus
- Free choice of connection technology
- Available as 2, 4, 8 or 16-channel version
- Local diagnostics and status display via LEDs
- Hot-Swapping function

**Base modules**

- Passive connection components for sensors and actuators
- Available as M8, M12, M23 and 7/8 connectors
- Connection of I/O modules with single, dual or multicore wiring
- Fast replacement of electronics through the use of separate connection bases

**Material recognition**

- Distinction of different metals or metallic compositions
- Distance independent material detection
- Inductive sensor with two analog voltage outputs

**Integration of valve terminals**

- 4, 8 or 16-channel digital output modules with M23 base modules for multiple valve terminals
- Up to 8 CANopen valve terminals with one CAN-valve interface connection module

**I/O-ASSISTANT**

- Planning, configuration, commissioning and diagnostic software
- Based on FDT/DTM technology
- Available as freeware on [www.turck.com](http://www.turck.com)

**CANopen**

**PROFIBUS**  
PROCESS FIELD BUS  
**BUS**

**DeviceNet™**

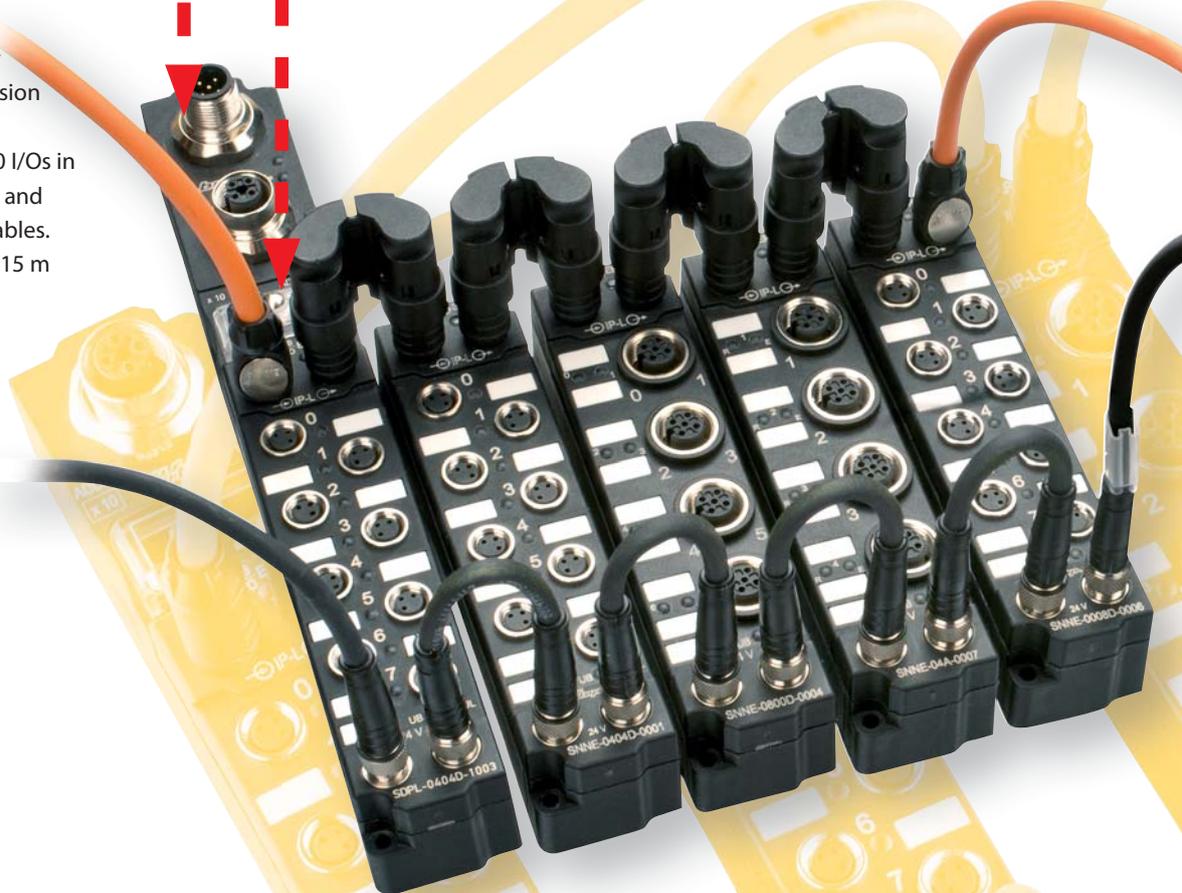

# The *piconet*<sup>®</sup> I/O system – in miniature housings for highest industrial requirements

## *piconet*<sup>®</sup> – Coupling modules

- As interface to the higher level control system
- Gateway between PROFIBUS-DP, CANopen, DeviceNet™, INTERBUS, EtherNet/IP™, Modbus TCP, PROFINET and fiber-optic cable based Sub-Bus „IP-Link“
- Coupling modules connect the higher level open fieldbus and the economical extension modules.
- Fiber-optic subnet (IP-Link) for connection of up to 120 extension modules per coupling module
- High-speed transmission, 1000 I/Os in approx. 1 ms via prefabricated and interference-free fiber-optic cables.
- Fiber-optic cable length up to 15 m

- Bus addressing switch and service interface to I/O-ASSISTANT software
- Bus LEDs
- Module/ IP-Link LEDs

## Compact and robust housing

- Only 26.5 mm high, 30 mm wide and 210, 175 or 126 mm long
- Fully encapsulated IP67 housing
- Suited for direct use on the machine
- Ideally suited for special or serial machine engineering as well as for various field applications

## *piconet*<sup>®</sup>-Stand-alone module

- Stand-alone modules connect the integrated I/Os directly with the open fieldbus, e.g. PROFIBUS-DP, CANopen, DeviceNet™, INTERBUS, Modbus TCP, EtherNet/IP and PROFINET

## A secure connection

- Prefabricated bus, fiber optic, power and I/O cables
- Field-wireable connectors
- Additional networking components such as T-pieces, terminating resistors etc.

**piconet® – Extension modules**

- Flexible and tested I/O connection technology in M8 x 1, M12 x 1 and M23 x 1
- Extension modules independent of the higher level fieldbus system

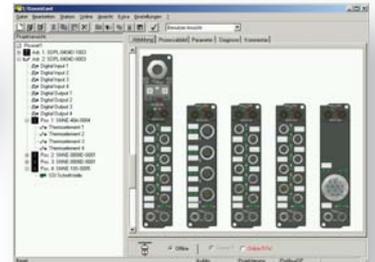

**piconet® – Bridges for fibre optics and power cables**

- Compact mounting
- Reduced space requirements
- Easy installation
- IP67

**Easy planning and configuration with the I/O-ASSISTANT**

Configuration software for

- Project planning
- Configuration
- Parameterization

**Description**

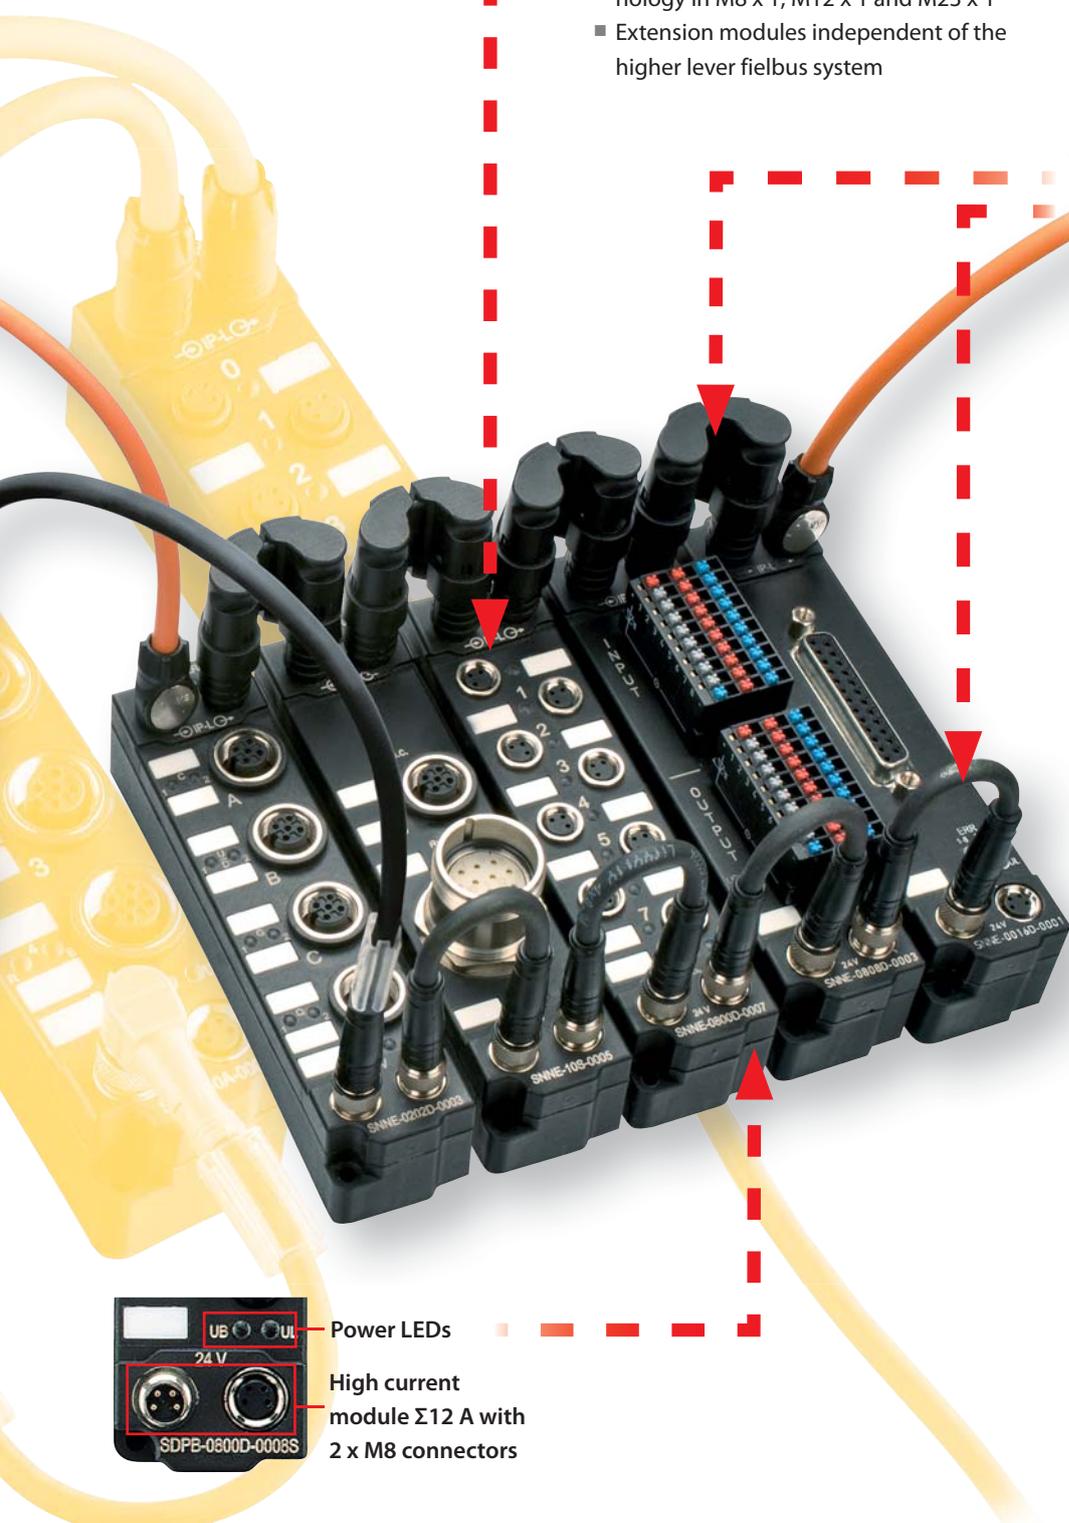

The configuration software I/O-ASSISTANT supports you in planning and implementation of an I/O system.

Whether in the online or offline mode, the I/O-ASSISTANT simplifies module configuration and parameterization.

The software is also extremely helpful in system set-up and testing.

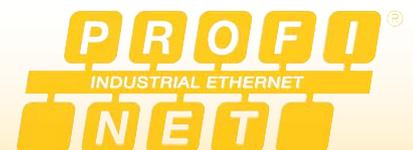

Power LEDs  
High current module  $\Sigma$ 12 A with 2 x M8 connectors

Modbus TCP

EtherNet/IP™

# Compact fieldbus I/O modules in IP67 and IP20

## Compact fieldbus modules

These rugged modules are ideal for use in harsh industrial environments (both electrical and mechanical).

No matter if PROFIBUS-DP, DeviceNet™, Modbus TCP, EtherNet/IP™ or PROFINET protocols are required, all compact fieldbus I/O modules are designed with the same mechanical concept and have the following characteristics:

- Fibre-glass reinforced plastic housing
- Fully encapsulated module electronics
- Standard connection technology
- Metal round connector
- Vibration and shock tested
- Degree of protection IP67

### FXDP – Configurable PROFIBUS-DP modules

- Freely configurable I/Os
- Channel-specific diagnostics
- Diagnostics according to PROFIBUS standard
- Diagnostics can be mapped to user data area
- Up to 16 digital channels

### FGDP – PROFIBUS-DP-Modules with galvanic isolation

- Channel-specific diagnostics
- Diagnostics according to PROFIBUS standard
- Diagnostics can be mapped to user data area
- Up to 16 digital channels
- Galvanic isolation of operating and load voltage

### FLDP – PROFIBUS-DP modules

- Module-specific diagnostics
- Up to 32 digital channels

**FDNL – DeviceNet™ modules**

- Channel-specific diagnostics (LX series) or module-specific diagnostics (SE series)
- Up to 16 digital channels
- Power supply via DeviceNet™

**FDNP – DeviceNet™ modules**

- Channel-specific diagnostics (LX series) or module-specific diagnostics (SE series)
- Up to 16 digital channels
- Separate power supply for the outputs

**FDN/FDP – IP20 modules**

- Extremely compact for mounting in tight spaces
- PROFIBUS-DP or DeviceNet™
- Up to 16 digital channels

**FXEN – Configurable Ethernet modules**

- Integrated Ethernet switch
- Freely configurable I/Os
- Channel-specific diagnostics
- Up to 16 digital channels

**Accessories**

- Cordsets – premoulded cables for bus, power supply and I/Os
- T and Y pieces Terminating resistors
- Flange connectors
- Feed-through receptacles
- Passive junction boxes

# The BL20 I/O system – The integrator for fieldbus, ident system, motor starter

## Gateway – The system control

- The interface to the higher level control system
- Gateways e.g. for PROFIBUS-DP, CAN-open, DeviceNet™, Ethernet/IP™ and Modbus TCP – also available as economy version

## Optional – CoDeSys programmable according to IEC 61131

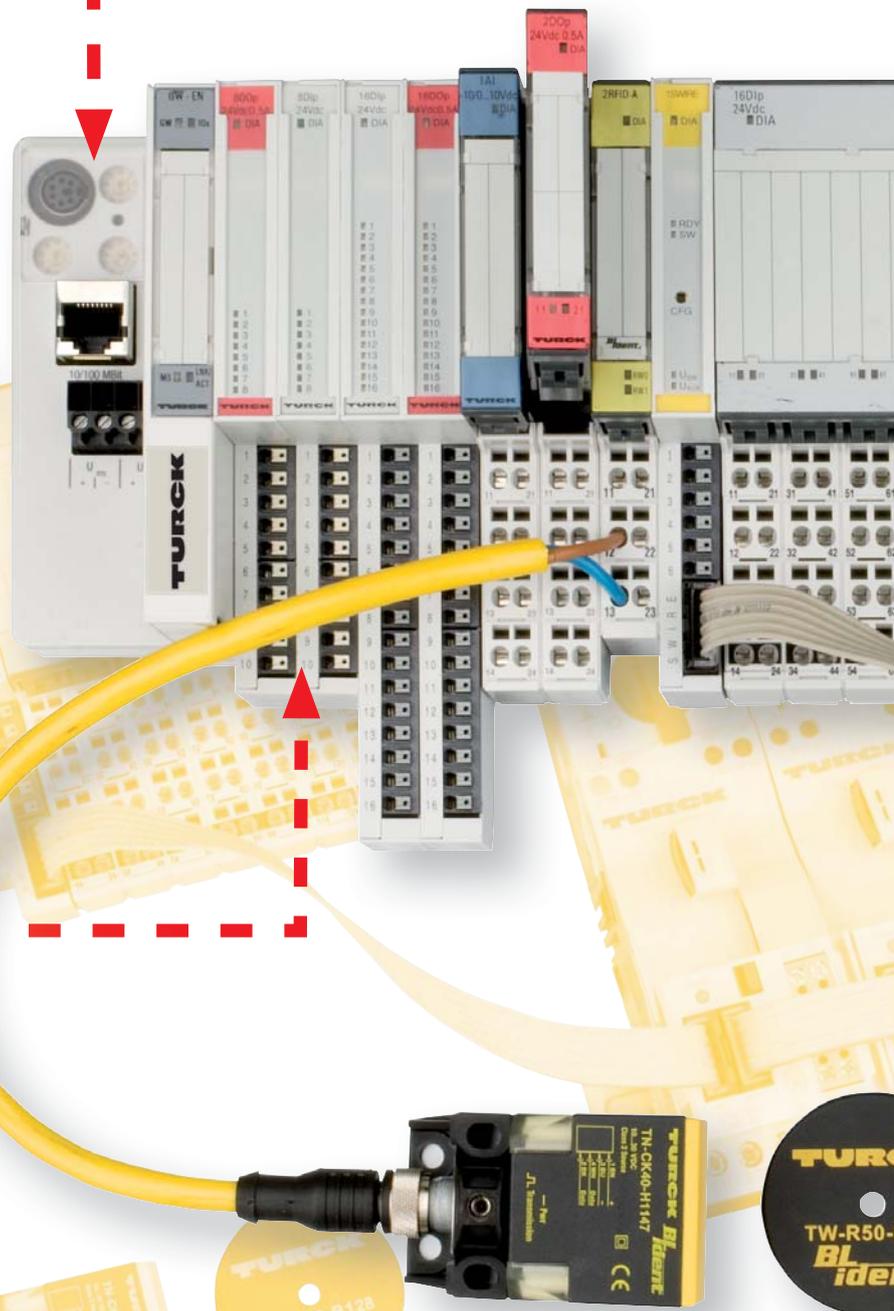

- Relieves higher-level controller and bus system
- I/O modules independent of the fieldbus
- Prefabricated function blocks e.g. for the RFID system *BL ident*®

## Economy I/O – extremely compact and competitively priced

- 8 or 16 I/Os in only 12,5 mm
- Integrated connection level with „Push-in“ tension spring technology, no tools necessary
- Economy I/Os combinable with standard I/O slices

## *BL ident*®, the RFID system

- Up to 8 RFID channels
- Pre-processing in programmable gateway relieves the higher-level controller.

Modbus TCP

**Standard I/O – multifunctional and system friendly**

- Exchangeable electronic modules – disconnection of field wiring is not necessary
- Up to two neighbouring modules are exchangeable during normal system operation without disrupting system functions
- Single or block modules with screw or cage clamp terminals

**I/O-ASSISTANT**

- Planning, configuration, commissioning and diagnostic software
- Based on FDT/DTM technology
- Available as freeware on [www.turck.com](http://www.turck.com)

**Motor starter**

(Direct and reversing starters up to 15 kW acc. to IEC/EN 60947-4-1)

- 3 connection-slices per gateway
- Up to 16 devices per slice
- Simple wiring

The motor starters consequently build upon the advantages of the BL20 system:

- Modular
- Flexible
- Simple mounting and operation
- Cost-efficient

**CANopen**

**PROFIBUS**  
PROCESS FIELD BUS  
**BUS**

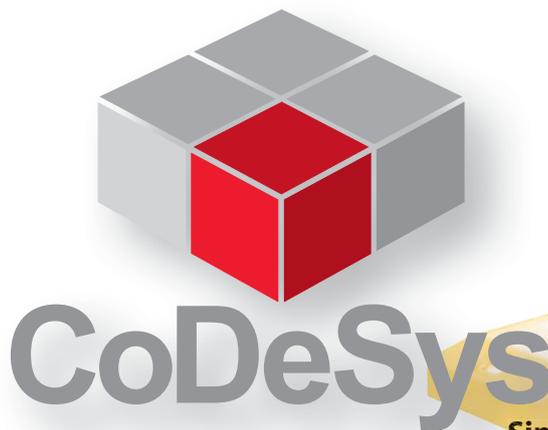

**DeviceNet™**

## Easy programming with CoDeSys according to IEC 61131-3

The programmable gateways become decentral control units with the CoDeSys programming software.

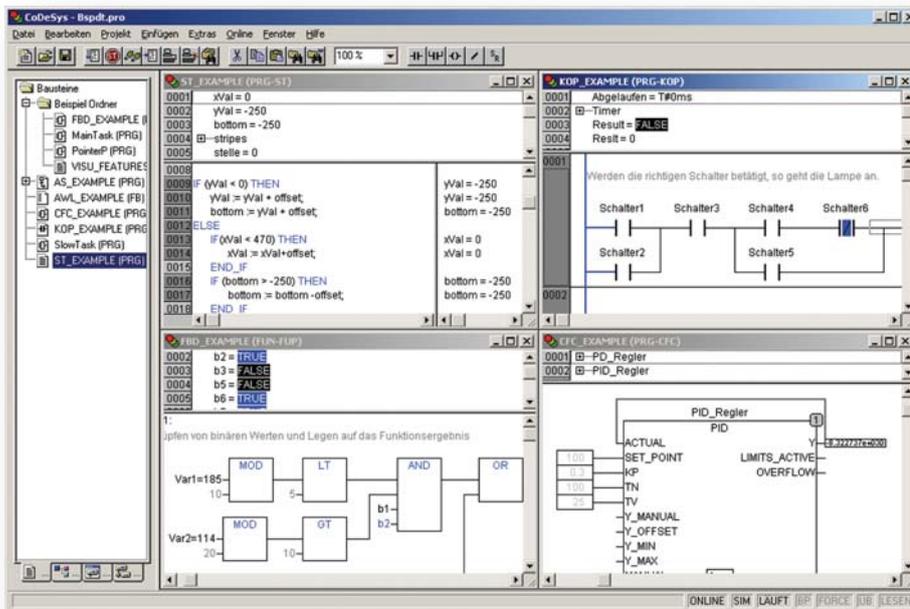

The graphical programming interface supports all IEC-61131-3 programming languages

- Instruction List (IL)
- Sequential Function Chart (AS)
- Function Block Diagramm (FBD)
- Structured Text (ST)
- Ladder Diagram (LD)

## Simple connection

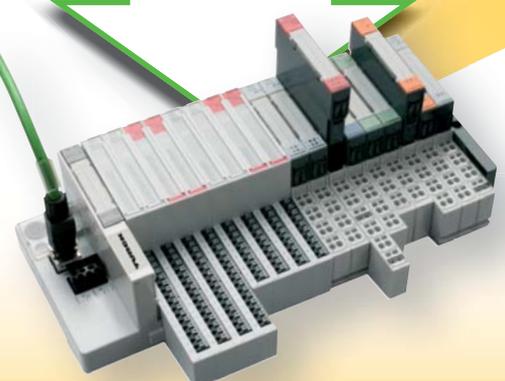

- Quick and simple connection of heterogeneous systems
- Standard transmission protocols such as e.g. TCP/IP and UDP/IP
- Network-global variables
- Bidirectional data exchange between CoDeSys systems
- Additional programming is not required

## Project planning and configuration

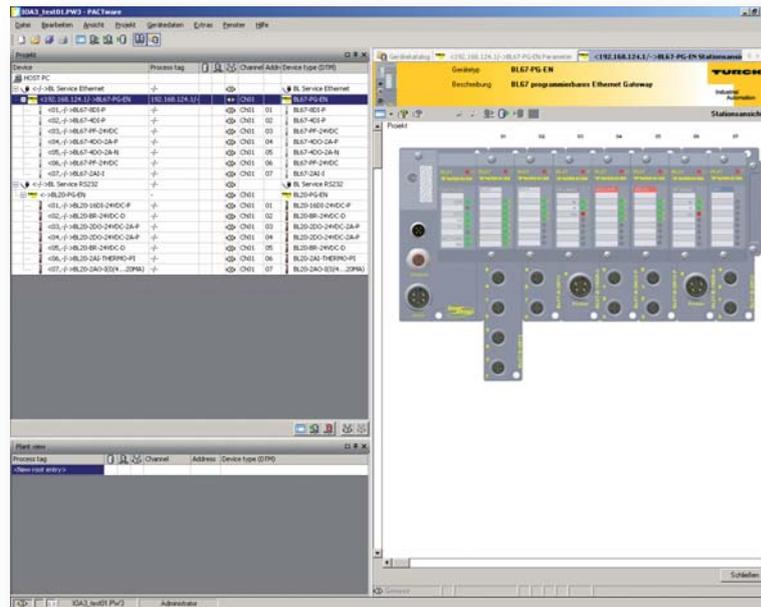

- Target-Support-Package as driver for the target system
- Drag and Drop function for the hardware configuration
- Standard editor for I/O configuration and parameterization
- Symbolic display of variables for I/O addresses
- Numerous diagnostics and commissioning functions
- Function blocks e. g. for the RFID system *BL ident*®

Data exchange via Ethernet

## Easy parameterization with I/O-ASSISTANT on the basis of FDT/DTM

- System configuration, parameterization and diagnostics with a graphical interface based on FDT/DTM technology
- DTMs can be integrated in any FDT frame application for configuration, commissioning and maintenance
- I/O-ASSISTANT and DTMs are available free of charge on [www.turck.com](http://www.turck.com)

## Description

The configuration software I/O-ASSISTANT supports you in planning and implementation of an I/O system. No matter if you are online or offline, the I/O-ASSISTANT simplifies the configuration as well as the configuration and parameterization of the modules.

This software is also extremely helpful in system set-up and testing.

## Functions

- Supporting software tool
- Selection of the required modules
- Offline planning and configuration of BL67 and BL20 modules
- Configuration, parameterization and commissioning of individual modules
- Reading and setting of process data
- Commissioning help for testing the wiring and sensors without PLC
- Realistic display of configured BL67 components
- Automatic documentation of configured BL67 and BL20 systems

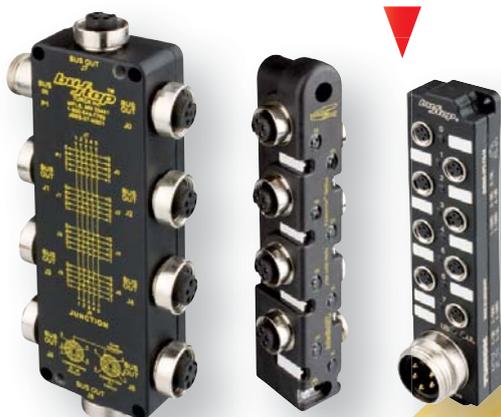

# Components for fieldbus and power supply infrastructure

Premoulded and tested connector systems significantly reduce the error rate of fieldbus installations and speed up system set-up. The components are simply plugged together – „Plug and Play“ is the motto!

## Passive junction boxes in IP67 for

- Fieldbus
- Power supply

## Active junction boxes in IP67

- Repeater
- Spanner
- Ethernet switches

## Fieldbus accessories

- T-pieces
- Y-pieces
- Flange connectors
- Feed-through receptacles
- Terminating resistors
- Field-wireable connectors

## Fieldbus cables

- PROFIBUS-DP
- DeviceNet™
- Ethernet/Industrial Ethernet

**Power supply**

- Premoulded cables
- Field-wireable connectors
- T-pieces
- Feed-through receptacles
- Flange connectors

**JIT – Delivery program**

Ideally the length of the cord set is adjusted according to the requirements of the plant. For this reason TURCK now offers a Just-In-Time-delivery service (JIT) for premoulded cables.

**The new JIT-5D-Program for perfect connections:**

- Just-In-Time delivery within 5 days only\*
- Free choice of cable length
- Premoulded fieldbus and power cables
- High flexibility with respect to planning and mounting of your application
- High cost savings

**Work-day**

**1.**

**Ordering until 12 pm**

**Production**

**JUST IN TIME!**

**Arrival at the customer**

**5. Work-day**

\* the 5 days apply only for deliveries within the European Union (EU)

**Sensor cables**

- M8
- M12
- M23
- valve connector

**Delivery 3 workdays after ordering**

**Power supplies in IP67**

**CANopen**

**PROFIBUS**  
PROCESS FIELD BUS

**Ethernet Modbus TCP**
