ø12 A2 / ø10 A1 / ø8 A8 Series Miniature Pilot Lights

Bright illumination face and snap-action switching. 22 mm short body.

Contact Ratings (Contact Block)

Rated Insulation Voltage		250V		
Rated Thermal Current		3A		
Operating Voltage (AC/DC)		24V	110V	220V
AC 50/60 Hz	Resistive Load	—	1.0A	0.5A
	Inductive Load	—	0.7A	0.5A
DC	Resistive Load	1.0A	0.2A	—
	Inductive Load	0.7A	0.1A	—
Contact Material		Silver		

- Minimum applicable load: 5V AC/DC, 3 mA
  (applicable range may vary with operating conditions and load types)

Weight (Example)

Weight (approx.)	A2 Series	4g (AL2M-M11, AL2M-P1, AB2M-M1)
	A1 Series	3g (AL1M-M11, AL1M-P1, AB1M-M1)
	A8 Series	2g (AL8M-M11, AL8M-P1, AB8M-M1)

Specifications

Operating Temperature		−25 to +55°C (no freezing)
Storage Temperature		−30 to +80°C (no freezing)
Operating Humidity		45 to 85% RH (no condensation)
Contact Resistance		50 mΩ maximum (initial value)
Insulation Resistance		100 MΩ minimum (500V DC megger)
Dielectric Strength	Switch Unit	Between live and dead metal parts: 2,000V AC, 1 minute Between terminals of different poles: 2,000V AC, 1 minute Between terminals of the same pole: 1,000V AC, 1 minute Between contact and lamp terminals: 1,500V AC, 1 minute
	Illumination Unit	Between live part and ground: 2,000V AC, 1 minute
Vibration Resistance		Damage limits, Operating extremes: 5 to 55 Hz, amplitude 0.75 mm
Shock Resistance		Damage limits:　500 m/s^2 (50G) Operating extremes: 200 m/s^2 (20G)
Mechanical Durability (minimum operations)		Momentary: 200,000 operations Maintained: 100,000 operations
Electrical Durability (minimum operations)		Momentary: 100,000 operations Maintained:　50,000 operations (Switching frequency 1200 operations/h)
Degree of Protection (*1)		IP40, IP65 (IEC 60529)

*1) IP65: A2 series only

LED Lamp Ratings (LAD-S)

Built-in LED Part No.	LAD-SA	LAD-SG	LAD-SR	LAD-SY
Lamp Base	Exclusive for A series			
Forward Current (If)	20 mA			
Forward Voltage (Vf) (nominal)	2.2V	2.1V	1.7V	2.2V
Reverse Voltage (Vr)	4V			
Illumination Color	A	G	R	Y
LED Lamp Color	Amber Clear	Yellow Diffused	Red Clear	Yellow Clear
Applicable Lens Color	Amber	Green	Red	Yellow and White
Base Plastic Color	Red			
LED Lamp Life (reference value)	Approx. 50,000 hours (The illuminance reduces to 50% of the initial intensity when used on complete DC.)			
Operating Voltage & External Current-limiting Resistor (recommended value) (Note)	5V DC:　150Ω, 1/2W 6V DC:　200Ω, 1/2W 12V DC: 510Ω, 1W 24V DC: 1.1 kΩ, 1W			
Internal Circuit	(+) ○——▷⊢——○ (−)			

Note:　When LED lamps are used on voltages other than the above, external resistor value R is determined by the following formula:
R = (operating voltage − Vf) / If

- LED lamps do not have a current-limiting resistor, and external resistors of recommended values for each voltage must be provided. Connect a current-limiting resistor in series, otherwise LED lamps will be damaged. Because no protection diode is contained, ensure the correct polarity is observed.

- The base plastic color for all LEDs are red.

Rectangular AL8H	Momentary	SPDT	AL8H-M11②		
	Maintained	SPDT	AL8H-A11②		
	Pilot Light	—	AL8H-P1②		

• LED lamps do not have a current-limiting resistor. Connect a current-limiting resistor in series, otherwise LED lamps will be damaged.

• AP8M series pilot lights (round bezel only) with built-in current-limiting resistor are also available.

• Pilot lights are not CCC certified.

ø12 A2 / ø10 A1 / ø8 A8 Series Miniature Pilot Lights

⚠ Safety Precautions

- Turn off the power to A series before starting installation, removal, wiring, maintenance, and inspection of the units. Failure to turn power off may cause electrical shocks or fire hazard.
- To avoid burning your hand, use the lamp holder tool when replacing lamps.

- For wiring, use wires of a proper gauge to meet the voltage and current requirements. Failure to tighten terminal screws may cause overheating and create a fire hazard.
Operating Instructions

### Replacement of Lens and Marking Plate

Removal
Remove the lens assembly (color lens, marking plate, lens holder, and spring) by holding the color lens recesses with the Lens Removal Tool (MT-101) and pulling it out. Remove the marking plate by disengaging the latches between the color lens and lens holder.
The marking plate must be engraved on the front side as shown below.

- A2 Series

Latches
Engraving Area
Color Lens   Marking Plate   Lens Holder

- A8, A1 Series

Latches
Engraving Area
Color lens   Marking Plate   Lens Holder   Spring Retaining Groove   Spring

Note: Make sure that the spring is inserted in the correct direction. The base of spring must fit the groove in the holder.

Installation
Place the marking plate on the lens holder in the correct direction, and press the color lens onto the lens holder to engage the latches.
Put the spring on the lens holder and insert the lens holder into the housing in the correct direction.

Installing Non-illuminated Button
Non-illuminated pushbuttons contain the same marking plate as illuminated units. Be sure to install the marking plate when replacing the button.
Replacing the LED Lamp

Removal
Use the lamp holder tool (OR-66) to remove lamps. Do not use pliers.

Installation
Use the lamp holder tool (OR-66) to install lamps. Note the correct side of the tool for removal or installation.

Lamp Holder Tool
OR-66 (ø8, ø10, ø12 series)
For removing lamps   For installing lamps

Panel Mounting
When mounting the units into a panel, use the optional locking ring wrench (MT-002/-003/-004) to tighten the locking ring. Do not use pliers. Tightening torque must not exceed 0.78 N·m (A8, A1 series : 0.29 N·m). Excessive tightening will damage the locking ring.

Wiring
Solder the terminal at 350°C within 3 seconds using a 60W soldering iron. Sn-Ag-Cu is recommended when using lead-free solder. When soldering, do not touch the unit with the soldering iron. Also ensure that no tensile force is applied to the terminal. Do not bend the terminal or apply excessive force to the terminal.
Use non-corrosive rosin flux.

Installing the Socket
Install the socket on the unit with the TOP markings on the unit and the socket placed in the same direction.

Operating Voltage of LED Lamps
The operating voltage is measured at complete DC. When using a pulsating voltage such as a full-wave rectification voltage, keep peak currents within the forward current If. Peak currents exceeding the If may shorten the LED lamp life.

Operating Instructions

Marking

For A series illuminated pushbuttons, legends and symbols can be engraved on the built-in marking plates, or printed film can be inserted under the lens.

Marking Plate & Engraving Area

A2 Series

Lens	Round	Square	Rectangular
Built-in Marking Plate	Engraving Area — ø9, 9, 0.8 — Size: ø10	Engraving Area — □8, 0.8 — Size: □10	Engraving Area — 8, 12, 0.8 — Size: 14 x 10

- Engraving must be made on the engraving area less than 0.5mm deep.
- The marking plate is made of white acrylic resin.

A1 Series

Lens	Round	Square	Rectangular
Built-in Marking Plate	Engraving Area — ø7.5, 7.5, 0.8 — Size: ø8.5	Engraving Area — □7.5, 0.8 — Size: □8.5	Engraving Area — 7.5, 11.5, 0.8 — Size: 12.5 x 8.5

- Engraving must be made on the engraving area less than 0.5mm deep.
- The marking plate is made of white acrylic resin.

A8 Series

Lens	Round	Square	Rectangular
Built-in Marking Plate	Engraving Area — ø5, 5, 0.8 — Size: ø6.1	Engraving Area — □5, 0.8 — Size: □6.1	Engraving Area — 5, 8, 0.8 — Size: 9.1 x 6.1

- Engraving must be made on the engraving area less than 0.5mm deep.
- The marking plate is made of white acrylic resin.

Other Notes

Close Proximity Mounting

When mounting pilot lights or illuminated pushbuttons collectively or lighting them continuously, heat may cause the ambient temperature to rise above the rated operating temperature. When the mounting panel is not made of metal or when the units are mounted in an enclosed panel, provide for ventilation or lower the operating voltage.

Replacement of Buttons (Illuminated/Non-illuminated)

Do not replace buttons of maintained action units while the button is in the locked position. Replacing the button in the locked position may damage the internal mechanism. Be sure to release the button before replacing.

Operating and Storage Environment

1. Make sure that the operating/storage temperature and humidity are within the ratings.
2. Do not use enclosed type units in an environment subject to oil, water or dust accumulation.

Microswitch Contacts

Do not connect NO and NC contacts of the microswitch to different voltages or different power sources to prevent a dead short-circuit.

IP65 Units (A2 series only)

IP65 units are evaluated by conventional cutting and cooling oils, and can not be used with some special oils. Contact IDEC for resistance against special oils.
