

Joystick E2 series

EROUND

Selection diagram

Code structure

Attention! The feasibility of a code number does not mean the effective availability of a product. Please contact our sales office.

E2 1MA14BZ91

Fixing ring and shaped ring

1	plastic ring (standard)
2	plastic fixing ring and shaped ring
3	metal ring
4	metal fixing ring and shaped ring

Joystick height

1	standard (55 mm)
2	reduced (45 mm)

Lock

Z	without lock
A	lock in all directions

Actuation

4B	UP spring-return, RIGHT spring-return, DOWN spring-return, LEFT spring-return
2F	LEFT spring-return, RIGHT spring-return
2B	UP spring-return, DOWN spring-return
4A	UP maintained, RIGHT maintained, DOWN maintained, LEFT maintained
2E	LEFT maintained, RIGHT maintained
2A	UP maintained, DOWN maintained

Main features

- Protection degrees IP67 and IP69K
- 2 possible heights: standard (55 mm) and reduced (45 mm)
- Versions with central lock
- Version with spring-return or maintained actuation
- Two-step actuation

Markings and quality marks:

EAC approval: RU C-IT DM94.B.01024

Technical data

General data

Protection degree:	IP67 acc. to IEC 60529 IP69K acc. to ISO 20653
Ambient temperature:	-40°C ... +80°C
Mechanical endurance:	1 million operating cycles 500,000 unblocking operating cycles
Max. actuation frequency:	3600 operating cycles/hour
Actuating force:	0.17 Nm (spring-return actuation) 0.3 Nm (maintained actuation)
Maximum travel:	35°
Tightening torque of the fixing ring:	2 ... 2.5 Nm
Utilization requirements:	see page 124 of the general catalogue HMI 2015-2016

In conformity with standards:

IEC 60947-1, IEC 60947-5-1, IEC 60204-1, EN 60947-1, EN 60947-5-1, EN 60204-1, UL 508, CSA 22-2 no.14

⚠ Installation with operator protection function:

Use only contact blocks marked with the symbol . Always connect the safety circuit to the **NC contacts** (normally closed contacts: .1-.2) as stated in standard EN 60947-5-1, encl. K, par. 2.

Compliance with the requirements of:

Low Voltage Directive 2014/35/EU

EMC Directive 2014/30/EU

Positive contact opening in conformity with standards:

IEC 60947-5-1, EN 60947-5-1.

General data

Protection degrees IP67 and IP69K

IP69K
IP67

The elastic hood of the Pizzato joystick is made in a single seamless piece that completely encloses the lever, in this way without leaving the minimum aperture or junction.

This particular solution (patent pending), is present in all versions of the joystick, including the reduced height and central lock versions, and is the most effective method to ensure protection from any possible penetration of dirt and water; these devices can therefore be used in all environments in which the highest degree of protection of the casing is required, and they pass both the IP67 immersion test acc. to IEC 60529 and the IP69K test acc. to ISO 20653 with jets of water at 100 atmospheres and 80°C temperature, thereby permitting their use also in machines which undergo washing with high-pressure jets of hot water.

Central lock

To prevent accidental operation, the E2 series joystick can be ordered in versions with central locking. In these versions the lever remains fixed in the central position and can be steered in the

various directions only after being unlocked by simply pulling the release disk. The pulling release movement avoids unwanted unlocking actions.

Easy configuration of the contacts

The joystick is paired with a mounting adapter with four slots, thus allowing to associate different types of contact blocks to every single direction of actuation. Single or double contact blocks, even on two levels, can be used.

There are therefore no constraints on the type of contact block, the users can freely install the standard contact block in the configuration they prefer.

Two-step actuation

The Pizzato Elettrica E2 series joystick combines a rich set of features and options in a compact and ergonomic shape.

Among these is the possibility to obtain two-step actuation in any direction: it is sufficient to connect an additional NO contact block with early make contacts in series to the normal NO contact block.

This option can be used for example to control two-speed actuations in the same direction.

Maintained or spring-return actuation

Versions with 2 or 4 directions are available, and the single directions can have a maintained actuation, in which the lever remains in the tilted position, or spring-return actuation, in which the lever automatically returns to the central position.

Two compact forms

version options, such as the possibility of being provided with central lock.

With the standard height version (55mm), there is also a reduced height (45 mm) version, ideal for all situations where a low height is required. Even so, the low height version of the joystick does not dispense with any of the standard

Plates for the joystick

The joystick can be paired with specific circular and rectangular plates. This accessory, available in black or grey colour, is the ideal complement for the joystick at both the functional and aesthetic level, creating an assembly of original and elegant design. The plates specify with clear indications the functions performed by the joystick, and can be customised with symbols or written text. The laser-engraved markings are indelible. The application of the plate does not alter the IP protection degree of the device.

Plates with shaped hole

Suitable for devices E2 •MA•••••.

Can be oriented in 90° steps.

Upon request with different markings or inscriptions in other languages.

It does not alter the IP67 / IP69K protection degree of the associated device.
